## **Vanadium Worksheet Notes**

### **Data Sources**

The sources of data for the vanadium worksheet are the mineral statistics publications of the U.S. Bureau of Mines and the U.S. Geological Survey—Minerals Yearbook (MYB) and its predecessor, Mineral Resources of the United States (MR); and Mineral Commodity Summaries (MCS), and its predecessor, Commodity Data Summaries (CDS). The years of publication and corresponding years of data coverage are listed in the References section below. Blank cells in the worksheet indicate that data either were not available or were being withheld because they are proprietary.

#### **Production**

Production data were for vanadium contained in mine or mill production and petroleum byproducts in the United States. Data were from the MR and MYB for the years 1901–54, and the CDS and the MCS for the years 1955–2000. When possible, the contained vanadium in mill recovery was used to account for vanadium from vanadium and uranium ores, as well as vanadium recovered from ferrophosphorous slag derived from domestic phosphate rock. Blank cells in the worksheet indicate that data were not available for the years 1900, 1903–06, 1908–10, 1924, and 1927–31. Cells for the years 1997–99 are blank in order to avoid disclosing proprietary data.

#### **Imports**

Import data report (when available) the amount of vanadium content in ash, ore, concentrate, residue, slag; vanadium pentoxide anhydride; other oxides and hydroxides; aluminum-vanadium master alloys, and ferrovanadium imported into the United States. Data were from the MR and MYB for the years 1908–54, and the CDS and the MCS for the years 1955–2000. Blank cells in the worksheet indicate that data were not available for the years 1900–07, 1909–17, 1931–33, 1956–58, 1961–63, and 1965.

#### **Exports**

Export data report (when available) the total amount of vanadium contained in vanadium pentoxide anhydride, other oxides and hydroxides, aluminum-vanadium master alloys, and ferrovanadium exported from the United States. Data were from the MYB and MR for the years 1902–54, and the CDS and the MCS for the years 1955–2000. Blank cells in the worksheet indicate that data were not available for the years 1900–02, 1904–11, and 1926–40.

#### Stocks

Stocks data report the amount of contained vanadium held in consumer stocks. Data were from the CDS and the MCS for the years 1955-2000. Blank cells in the worksheet indicate that data were not available for the years 1900–54.

# **Apparent Consumption**

Apparent consumption was estimated for the years 1901–03, 1907–08, 1911–30, and 1919–2000 by using the formula:

APPARENT CONSUMPTION = PRODUCTION + IMPORTS - EXPORTS ± CHANGES IN STOCKS.

Apparent consumption was estimated by interpolation for the years 1903–06, 1909–10, 1916, 1918, 1931 and 1992. Stocks were included when reported. Blank cells in the worksheet indicate that datum was not available for the year 1900.

### Unit Value (\$/t)

Unit value is the value, in dollars, of 1 metric ton (t) of vanadium apparent consumption. Data were from the MR and MYB for the years 1910–54, and the CDS and the MCS for the years 1955–2000. Unit value was estimated for the United States in actual dollars by using the price derived from dividing the vanadium pentoxide price by 0.5602. Unit value was interpolated for the years 1913–14, 1918, 1920–22, 1924, 1927–29, 1931, 1934–40, 1953–54, and 1962–63. Blank cells in the worksheet indicate that data were not available for the years 1900–09.

#### Unit Value (98\$/t)

The Consumer Price Index conversion factor, with 1998 as the base year, is used to adjust unit value in current U.S. dollars to the unit value in constant 1998 U.S. dollars. Blank cells in the worksheet indicate that data were not available for the years 1900–09.

# **World Production**

World production data were for mine production of vanadium. Data were from the MR and MCS for the years 1902–54, and the CDS and the MCS for the years 1955–2000. Blank cells in the worksheet indicate that data were not available for the years 1900–11, 1923–24, 1926, 1932–33, 1944, 1948–59, and 1985–89.
